

Fabrice Legeai⁷, Jean-Pierre Gauthier⁷, Denis Tagu⁷
François Cousserans⁸, Philippe Fournier⁸

⁸UMR BIVI, INRA, Montpellier

- Develop a platform of structural and functional annotation supported by comparative genomics results
- Dedicated to plant and bio-aggressor genomes
- Allowing both automatic predictions and manual curation of genes and transposable elements
- User-friendly, generic, modular, portable, sustainable, upgradable et compatible
